

Online Photography Portfolio

Web Technologies Lab · Output Screenshots (Week 1 to Week 11)

Week 1	Static web pages: Home Page, Login Page
Week 2	Registration Page using HTML forms with basic input validations
Week 3	Internal, external and inline CSS applied to Week 1 and Week 2 pages
Week 4	JavaScript validation of the registration page fields
Week 5	Catalogue page using HTML, CSS and JavaScript
Week 6	XML file displaying the information, validated with a DTD
Week 7	Review and Skill Test-1 (no program output)
Week 8	Ajax / Fetch API program to load text data asynchronously
Week 9	Ajax / Fetch API program to parse JSON/XML response data
Week 10	Ajax / Fetch program to send data using the POST method
Week 11	TypeScript program using an interface, a class and a function

Week 1 — Static Web Pages

Develop the static web pages required for the web site: Home Page, Login Page.

Output 1.1: Home page (home.html)

Online Photography Portfolio

Welcome to My Photography Portfolio

Welcome to my online photography portfolio. Explore different types of photography and beautiful moments.

Photography Categories

- Nature Photography
- Wildlife Photography
- Portrait Photography
- Travel Photography

About Photography

Photography is the art of capturing beautiful moments, people, places and nature through images.

Week 1 — Static Web Pages

Output 1.2: Login page (*login.html*)

Online Photography Portfolio

Capturing moments, one frame at a time.

Login

Email: Password:

Week 2 — Registration Page

Create the Registration Page using HTML forms with basic input validations.

Output 2.1: Registration form with sample data (register.html)

Photography Portfolio

Name: Email: Phone: Password: Photography Interest:

All fields are required.

Already registered? [Login](#)

Week 3 — CSS Styling

Apply internal, external and inline CSS for the Week 1 and Week 2 pages.

Output 3.1: External CSS only — login page linked to week_3/style.css

Source: `<link rel="stylesheet" href="../week_3/style.css">`. It supplies the whole theme — page background, heading bar, form card, input and button styles. The login card has no coloured top border yet and the tagline is plain black.

Online Photography Portfolio

Capturing moments, one frame at a time.

Week 3 — CSS Styling

Output 3.2: Internal CSS added — the `<style>` block inside the page head

Source: `<style> .login-container { border-top: 4px solid #f59e0b; } .tagline { color: #64748b; font-style: italic; } </style>`. Effect: the amber top border on the login card and the grey italic tagline.

Week 3 — CSS Styling

Output 3.3: Inline CSS added — style attribute written on the element itself

Source: `<p class="tagline" style="margin-top: 18px;">`. Effect: extra spacing above the tagline. Being inline, it has the highest priority of the three.
